Subject: Quick update on my sites

Hi Team,

Just wanted to give you guys a quick update on my sites in case something flares up while I am gone. Nothing too much beyond the update I gave you yesterday at the team meeting.

Smurfit Stone is the site most likely to need attention while I am out. I've handed the comm strat off to Pat Courtney, and have asked her to look into the Qs and As in greater detail. Susan Griffin and Dan Wall have looked into our data from a human health point of view, and a ecological risk point of view, respectively. My goal is to get the ARR report out by the end of August. During a communication meeting held a few weeks back, it was agreed that Joe Vranka would handle media calls. I've sent around the latest version of the communication strategy on 7/30, and he has a copy. Only a significant piece of news on the Smurfit could lead to people calling.

Pavillion isn't likely to need too much attention. The Pavillion pits workgroup has plans to reconvene early Sept, so I doubt there will be a big need prior to then. If there is, Greg Oberley and Ayn Schmit are caught up on the issues.

I just put two new TDDs out. One for a SI at Eureka Solvent and one for a Site Reassessment at Helena Solvent. I strongly doubt any state or local folks will be interested, but if START has trouble with getting going, a contractor (I don't know who they are yet) may call over looking for direction. I wanted them to get working while I was gone rather than delay for a few weeks with the short sampling season in MT.

Thanks guys. See you on the 20th.

Rob Parker
Site Assessment Manager, Environmental Engineer
